

WORLD FUTUREVISION CENTER

Experience The World Of Tomorrow

World Futurevision in 5 Based Locations:

As a Location-Based Entertainment (LBE) venue, the World Futurevision Center would offer visitors a unique, immersive experience focused on futuristic themes over the world. Here's how it might be structured:

Museum of Tomorrow:

This state-of-the-art museum features interactive exhibits that showcase the technologies, innovations, and sustainable practices that will shape our future.

Visitors can explore futuristic cities, advancements in healthcare, environmental solutions, and more through immersive displays, holograms, and augmented reality experiences.

It's like a museum turned upside down, only it shows the future.

World Treasure Ride:

**In this new combination of a water
coaster,
rafting, and themed ride,
visitors will be put to the test on a
breathtaking treasure hunt,
all while experiencing a brand-new
water attraction.**

VR Experience - The Future Unfolded:

Dive into a virtual reality adventure that takes you on a journey through time, allowing you to witness the evolution of technology and society over the next 150 years. From smart cities to space exploration, this immersive experience lets you see the future up close.

Futuristic Playground:

A specially designed area for children that combines traditional playground elements with interactive and educational features. Kids can engage in activities that teach them about science, technology, and the environment in a fun and engaging way.

Shopping Experiences and Restaurants:

World Futurevision offers a unique shopping experience where visitors can purchase cutting-edge products and sustainable designs. The shopping areas are designed to reflect the futuristic themes of the center, offering everything from innovative gadgets to eco-friendly fashion.

Restaurant of the Future: A visionary dining experience that blends cutting-edge technology with sustainable enjoyment. In this futuristic restaurant, guests encounter a new way of dining where innovation, environmental consciousness, and pleasure are at the forefront:

Future Wheel: This giant Ferris wheel features a VR experience that lets you see how the city looked in the Future and how it has evolved over time.
in the Middlepoint of the LBE Center of World Futurevision.

Special Information and Features:

The World Futurevision Center should not only be fun and learning about the world but also go new ways ecologically and biologically, e.g. power generation by solar cells that are generated on the building or on the building to ensure the power generation for the center but also with batteries to have the highest possible energy for the center without possible contribution from the city.

Either on the roof of the building or next to it a small field with solar panels or batteries.

Nevertheless, to keep the power grid of the municipality or city as a 2nd power grid.

Also for snack bars and restaurants to buy possible regional ingredients for food and generate new foods.
